FEATURES

Safety and joint durability are the main features of this easy installation system that guarantees the elimination of gaps between boards throughout the floor's lifetime. The pressure exerted between boards reinforces the union and prevents it from being carried out incorrectly.

Slight smoothing of the wood using a brush to achieve a surface with a slight relief.

L'ANTIC COLONIAL's varnishing, in two finishes, APRESTO (gloss) and APRESTO MATE (matte), provides a unique surface quality that satisfies the most demanding requirements. Advantages: It achieves the highest cleanliness because, since the pores are seal...

Is suitable for installing on water radiant heating

Material with many knots on its surface that can have different sizes depending on the type of wood. These, along with any cracks that may appear, are covered with putty.

It is necessary to apply adhesive for installing it.

There are consistent color changes between pieces.

Material from a European country.

Structure consisting of an upper layer that has the noble look of the material, an intermediate layer of coniferous wood that compensates the tensions between the different parts, and a bottom plywood that provides dimensional stability.

Applying a color oil or varnish on the wood surface in order to get different color ranges.

Beveled cut on the long sides of the board in order to create a continuity effect

Quality product made with selected raw materials, guaranteeing its full residential use for 30 years as provided by L' Antic Colonial.

Format where only one board has been used to finish the entire base surface

Installation system where gluing the boards to the floor is not necessary. They are installed on a foam and joined together

Made with oak wood.

Material from a North American country.
