FEATURES

Safety and joint durability are the main features of this easy installation system that guarantees the elimination of gaps between boards throughout the floor's lifetime. The pressure exerted between boards reinforces the union and prevents it from being carried out incorrectly.

Applying a color oil or varnish on the wood surface in order to get different color ranges.

Combination of oils and natural waxes with air drying that leave the wood with open pores. This type of oil penetrates into the wood continuously, even when it is fitted, so that it may have a 'dry' look when opened to be installed. Advantages: Easy repair of dents and scratches, very natural look, and easy maintenance with the right products. Right after installing and before its first use we recommend the use of CLEAN&GREEN AQUA OIL 1 L.

Is suitable for installing on water radiant heating

Material with some knots on its surface that can have different sizes depending on the type of wood. These, along with any cracks that may appear, are covered with putty.

Installation system where gluing the boards to the floor is not necessary. They are installed on a foam and joined together

There are considerable color changes between pieces.

Material from a European country.

Noble layer

Slight smoothing of the wood using a brush to achieve a surface with a slight relief.

Beveled cut on the long sides of the board in order to create a continuity effect

Quality product made with selected raw materials, guaranteeing its full residential use for 30 years as provided by L' Antic Colonial.

Format where only one board has been used to finish the entire base surface

It is necessary to apply adhesive for installing it.

Made with oak wood.

Material from a North American country.

Structure consisting of an upper layer that has the noble look of the material, an intermediate layer of coniferous wood that compensates the tensions between the different parts, and a bottom plywood that provides dimensional stability.
